Disadvantages.

1. Selective Motivation (All-or-Nothing engagement)

What it is

- engages deeply only when a problem feels meaningful.
- If meaning is absent, energy drops sharply.

Consequence.

- Appears Lazy, inconsistent, or undisciplined in routine tasks.
- Performance variance is high.

2. Difficulty with Routine and Repetition.

What it is

- Low tolerance for repetitive, mechanical work.
- Once the "core insight" is extracted, execution feels draining.

↳ • you wait to feel ready instead of deciding & moving.

- You are getting psychological satisfaction from asking, analyzing, and deciding, instead of from executing.

So loop becomes:

Ask → Analyze → Feel clarity → Feel progress → Stop
(without doing)

Your mind registers clarity as completion.

Fix: No perfect start, Act while uncertain, then let reality correct you.

Over-Internalization.

What it is

- processes internally rather than externally
- Tends to think silently and deeply.

Consequence

- Delays asking for help.
- Misses early feedback.
- Can feel isolated in collaborative environments.

4. Rigour Comes Late (Not First)

What it is

- prefers insight first, structure later.
- Formal proofs, step-by-step justification may feel secondary.

Consequence

- Gaps in explanation.
- Ideas may be correct, but poorly communicated or justified or structured

5. Tunnel Vision after commitment

What it is

- Once [redacted] commits to an interpretation, it digs deeply.
- Switching perspectives becomes difficult.

Consequence.

- Late recognition of wrong assumption.
- Resistance to abandoning an invested approach.

6. Emotional Filtering of Tasks.

What it is

- Emotional response determines cognitive energy.
- Neutral tasks feel heavier than objectively hard ones.

Scanned with OKEN Scanner

Consequence

- Misjudges effort
- Avoids "easy but boring" work.

7. Intensity Misalignment.

What it is

- [redacted] brings depth to problems that do not require it.

Consequences

- Overthinking
- Spending too much time on low-impact details.
- Frustration when other moves quickly.
